

To better understand the EMS system's **readiness** to care for pediatric patients, the **EMS for Children Program** conducted a national survey of EMS agencies. The following are the results of this quality improvement effort. EMS agencies can learn more about their state efforts by contacting their state EMS for Children Program Manager shown in the Resources sections of this 3-page report.

2022 National EMS for Children Survey Results

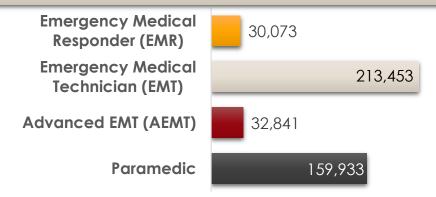

Agencies by Highest Licensure

Who took the survey?

Type of Providers Reported

Pediatric Call Volume by Number and % of Agencies

Call Volume	#	%
NONE: No pediatric calls in the last year	240	2.9%
LOW: Twelve (12) or fewer pediatric calls in the last year (1 or fewer pediatric calls per month)	3,238	39.1%
MEDIUM: Between 13-100 pediatric calls in the last year (1-8 pediatric calls per month)	3,265	39.4%
MEDIUM HIGH: Between 101-600 pediatric calls in the last year (8-50 pediatric calls per month)	1,165	14.1%
HIGH: More than 600 pediatric calls in the last year (more than 50 pediatric calls per month)	352	4.2%
No Response	27	0.3%
Grand Total	8,287	100%

Percent & Type/Method Skill Checking Reported

Frequency of Skill-Checking on Pediatric Equipment

<u>Click here</u> and go to page 35 to see how the skill-checking points were calculated.

Significance

The processes & frequency of skill-checking evaluations for EMS providers has long been established as important for the maintenance of skills when treating patients for improved patient outcomes.¹⁻³

Miller's Model of Clinical Competence provides a framework for clinical evaluation that theorizes that competency for clinical skills can be demonstrated for EMS through a combination of skill stations, case scenarios & simulations, & real-life field observations with a frequency of at least twice a year.³⁻⁴

2022 National EMS for Children Survey Results

What is a PECC?

Emergency Care

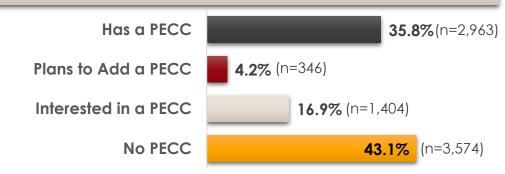

Coordinator or PECC, who is responsible for coordinating and championing PEDIATRIC-SPECIFIC activities for an EMS agency. This individual(s) could serve as the PECC for one or more EMS agencies.

Prepared by the EMS for Children Data Center (EDC), formerly known as NEDARC, located at the University of Utah School of Medicine. July 2022 www.nedarc.org

PECC at Agencies

Agencies who Have a PECC – Top 5 Reported PECC Duties

Promote pediatric continuing education opportunities	96.8%
Ensure that fellow providers follow pediatric clinical practice guidelines and/or protocols	94.9%
Ensure the availability of pediatric medications, equipment, and supplies	92.5%
Oversee pediatric process improvement initiatives	87.3%
Ensure the pediatric perspective is included in the development of EMS protocols	83.9%

Significance

A study of the readiness of hospital emergency departments (EDs) to care for children has shown that EDs are more prepared to care for children when there is a PECC who is responsible for championing & making recommendations for policies, training, & resources pertinent to the emergency care of children.¹ While this study was conducted in EDs, the 2020 joint policy statement,² Pediatric Readiness in EMS Systems, states the importance of EMS physicians, administrators, & personnel to collaborate with pediatric acute care experts to optimize EMS care for children to improve outcomes. In further support of the importance of EMS agency PECCs, a recent study "found that the availability of a PECC in an agency is associated with increased frequency of pediatric psychomotor skills evaluations."
